1 IS ENOUGH

3-day action against thrush in a single tablet

Canesten 1
clotrimazole

"Treatment of vaginal candidosis with a single 500 mg clotrimazole pessary [Canesten 1] was found to be as effective as previous treatment regimens of longer duration."

Prescribing information: Presentation: Canesten 1 is available as a single 500 mg vaginal tablet with applicator. Dosage: A single vaginal tablet to be inserted per vaginam, before bedtime, at night. Side effects: Rarely, patients may experience transient local redness or irritation. Further information available from Bayer UK Limited Pharmaceutical Division, Bayer House, Stanberry Hill, Newbury, Berkshire RG13 8EA. Telephone: Newbury 6401, 6402.
ZOVIRAX CREAM

Presentation: Acyclovir 5% w/w in a white aqueous cream base.

Uses: Treatment of herpes simplex infections of the skin including initial and recurrent genital herpes and herpes simplex labialis.

Dosage and administration: Zovirax Cream is applied five times daily at approximately four-hourly intervals. Treatment should be continued for 5 days. If healing is not complete, treatment may be continued for a further 5 days. Therapy should begin as early as possible after the start of an infection, preferably during the prodromal period.

Contra-indications: Patients known to be hypersensitive to acyclovir or propylene glycol.

Warnings and adverse effects: Not for ophthalmic use. Transient burning or stinging following application may occur. Erythema or mild drying and flaking of the skin have been reported in a small proportion of patients.

Basic NHS costs: 2g tube (PL3.00) £3.86, 10g tube £14.66.

Further information is available on request.

International Medical Course

Sexually transmitted diseases

26 - 31 October 1986 in London

The aim of this course is to examine in depth a series of topics of importance in clinical practice and to review recent advances in diagnostic techniques and anti-viral therapy in the management of sexually transmitted disease.

The course participants will be expected to take an active part in discussions, and the organizers consider these discussions to be as important as the formal seminars and presentations.

The joint Directors of Studies will be Professor M W Adler and Dr A Mindel of the Academic Department of Genito-Urinary Medicine, The Middlesex Hospital Medical School, University of London.

The course is designed for specialists in genito-urinary medicine, dermato-venereology, infectious and communicable diseases. Applicants should be of consultant standing or senior scientists.

There are vacancies for 35 participants.

Fee £550 Residential, £385 Non-residential.

Residential participants will be accommodated at a hotel in central London where the sessions will also take place.

Applicants are advised to apply before 30 June 1986.

Further information and application forms are available from British Council Representatives overseas or from Courses Department, The British Council, 65 Davies Street, London W1 Y 2AA.
