The Faculty of Medicine of the University of Lausanne is opening a position of

Professor of Clinical Pharmacology
(Full or Associate)

heading the Division of Clinical Pharmacology of the Department of Internal Medicine.

Candidates must have a MD degree, a good training in clinical medicine, strong experience in teaching, and research achievements in the field of clinical pharmacology.

Please direct inquiries, including curriculum vitae, teaching and research experience, statement of future goals, selected recent reprints and other examples of academic and professional work to the Dean of the Faculty of Medicine, Rue du Bugnon 9, CH - 1005 Lausanne, Switzerland, before 1th June 1994.

A full job description and particulars can be obtained at the same address.
NEUROGASTROENTEROLOGY AND MOTILITY
The Official Journal of the European Gastrointestinal Motility Society

Editors
Dr N Read, University of Sheffield, UK
Dr D Grundy, University of Sheffield, UK

New Beginnings
From 1994 Neurogastroenterology & Motility is the Official Journal of the European Gastrointestinal Motility Society. Formerly called the Journal of Gastrointestinal Motility, the journal has been retitled to reflect the way in which the scope of the journal has evolved as the field of gastrointestinal motility has continued its rapid expansion.

Aims & Scope
Neurogastroenterology & Motility is an international journal with the aim of covering all aspects of gastrointestinal motility and its control, and in particular the changing emphasis on neural mechanisms. Much of the recent growth in the field has been on neural control of secretion, absorption and blood flow.

Neurogastroenterology & Motility aims to be at the forefront of such developments in the field.

Features
Neurogastroenterology & Motility publishes original research and review articles, abstracts of symposia, meeting reports and book reviews. The journal encourages papers on all basic and clinical aspects of gastrointestinal motility and its control by myogenic, neural and chemical mechanisms. Papers on the way motility interacts with other gastrointestinal functions including absorption, secretion and immunology are also encouraged.

Subscription Information
Neurogastroenterology & Motility is published quarterly.
Subscription rates for 1994 are:

<table>
<thead>
<tr>
<th></th>
<th>Europe</th>
<th>Overseas</th>
<th>USA &amp; Canada*</th>
</tr>
</thead>
