C. F. PALMER

**top name**

for physiology and pharmacology apparatus

Known and used in physiology and pharmacology laboratories all over the world, C. F. Palmer equipment has a long-standing reputation for quality, reliability and precision. New products are continually under development, and as a member of the Baird & Tatlock Group, C. F. Palmer have extensive research and development facilities at their disposal.

Palmer equipment is now available on improved deliveries. For a revised delivery schedule, or to order your new catalogue, write to the address below.

Palmer kymographs such as this are in service in laboratories all over the world, providing smoked paper records of muscle and tissue movement, or through a manometer, of blood pressure. A 6-gear motor gives paper speeds from 1 mm to 10 mm per second. A.C. time-clock and signal markers, and the Starling ventilation pump are fitted.

Continuous injector. This unit, which can be used with all sizes of record-type syringes, automatically controls injection rates. A range of motor speeds is available giving emptying rates of from 10 mins. to 480 mins. per inch.

Square-wave Stimulator. Provides a square-wave output of independently variable pulse rate (1/20-100 p.p.s.), pulse width (10 microsec. to 100 millisec.) and intensity. Pulse rate is controllable either in steps or continuously.
