Brand's
MEAT AND FISH PROTEIN FOODS
FOR BABIES

The makers of Brand's Essence are pleased to introduce Brand's Strained Protein Foods (Meat and Fish) for Babies.
Brand's Strained Beef and Brand's Strained Veal are all fine quality meat, ground to a smooth meat purée and moistened with meat broth. A little salt is added for flavouring.
Brand's Strained Fish is all selected white fish, prepared in purée form similar to the strained meats.
Clinically tested, Brand's Strained Protein Foods were very well received and very well tolerated. They are recommended as an addition to normal infant diet, and are especially helpful during weaning. They can be given from the age of 3½ to 4 months onwards (according to the physician's advice).

BRAND'S STRAINED BEEF
BRAND'S STRAINED VEAL
BRAND'S STRAINED FISH

Brand's Strained Protein Foods are free from preservatives; heat-sealed and sterilized, in 1½ oz. glass jars.
Professional samples and literature on request.

BRAND & CO. LTD., MAYFAIR WORKS, VAUXHALL, S.W.8
Intramuscular Iron

and the

Anaemias of Infancy

The value of Imferon in Nutritional Anæmia of Infancy and in the prophylaxis and treatment of Anæmia of Prematurity has recently been convincingly demonstrated.

"There was obvious rapid clinical improvement in all cases as shown by the return of appetite, change of disposition, improvement in colour, and gain in weight."

"The daily rise in hæmoglobin during the first two weeks after treatment was almost 1.5%."—Brit. Med. J., 1955, 2, 700.

Imferon is the most practical and effective means of administering iron to infants who do not make progress on oral preparations. The increase in hæmoglobin concentration is about 20% in two weeks—more than can be achieved with any form of oral therapy.

THE INDICATIONS FOR IMFERON IN INFANCY ARE:

1. Nutritional anæmia in infants who do not make progress on oral iron,
2. Nutritional anæmia in infants whose home conditions are poor and who would otherwise have to be admitted to hospital.
3. The prophylaxis and treatment of anæmia of prematurity.
4. As an alternative in some cases to blood transfusion.

FURTHER INFORMATION IS AVAILABLE ON REQUEST.

Imferon is issued in ampoules of 2 ml. (100 mg. Fe) in boxes of 10 and 100.

AMPHETETONE REGISTERED

A GENERAL STIMULANT FOR THE CENTRAL NERVOUS SYSTEM

For cases requiring a quick-acting general stimulant without increasing the patient's appetite, we consider Amphetone unique. It combines for the first time Dexamphetamine Sulphate and Strychnine with Glycochophosphates and members of the Vitamin B Group. The Dexamphetamine provides the convalescent with an immediate feeling of well-being, this being followed by the well-known tonic effects of the other medicaments. Clinical reports have been excellent.

FORMULA

Dexamphetamine Sulphate B.P.C., 1/12 grain; Strychnine Hydrochloride B.P., 1/60 grain; Calcium Glycochophosphate B.P.C., 2 grains; Sodium Glycochophosphate B.P., 2 grains; Ascorbic Acid (V. C. B.P.), 1/30 grain; Nicotinamide B.P., 1/4 grain; Riboflavin B.P., 1/60 grain; Syrup of Blackcurrant B.P.C., 2 fluid drams; Water, to 1/2 fluid ounce.

Available in bottles containing 10, 20, 40, and 80 fluid ounces. Professional prices 4/8, 8/10, 14/7, and 56/6 each. Samples available on request.

JAMES WOOLLEY, SONS & CO., LTD., VICTORIA BRIDGE, MANCHESTER 3

An accepted combination in the chemotherapy of tuberculosis is P.A.S. together with isoniazid or streptomycin. Either combination, according to a recent Medical Research Council report (1), is very effective and helps to delay the appearance of resistant strains. P.A.S. has, however, the disadvantage of being poorly tolerated; many patients would welcome an alternative. Therapas, first synthesized in our laboratories in 1951, was introduced as an alternative to P.A.S. to which it is converted in the body (2). Preliminary trials have shown that Therapas may be effective in delaying the emergence of resistant strains to isoniazid or streptomycin, when used together with either of these drugs, and also that it has a therapeutic action per se. It gives satisfactory clinical and radiological results in the treatment of pulmonary tuberculosis (3, 4) and of genito-urinary tuberculosis (5). Since it has a sweet, not unpleasant, taste it is usually much preferred by the patient.

**dosage**

 Therapas may be administered in daily doses of 14 G.

**availability**

Individual packets of 3.5 G. in boxes of 100 packets.
1 G. cachets in containers of 100 and 500.
Bulk Therapas powder in containers of 100 G. and 500 G.

*Further information and prices from Smith & Nephew Ltd., Welwyn Garden City, Herts.*

---

**to summarize**

- a
  Therapas may be just as effective as P.A.S.
- b
  It is often better tolerated.
- c
  And it can be used wherever P.A.S. is indicated.
Transvasin

brings the esters of NICOTINIC ACID  
SALICYLIC ACID  
p-AMINOBENZOIC ACID

to the focal point of  
soft-tissue rheumatism

The esters in Transvasin, a new preparation developed by Hamol S.A., our Swiss associates, readily pass the skin barrier in therapeutic quantities and enable an effective concentration of the drugs to be built up where they are needed. Transvasin not only induces vasodilation of the skin with a superficial erythema, but also brings about a deep hyperaemia of the underlying tissues. It is non-irritant, and can be safely used on delicate skins. It is now being widely prescribed with successful clinical results. Since a very small quantity is sufficient for each application, the cost of treatment is extremely low.

Salicylic acid tetrahydrofurfuryl-ester 14%  
Nicotinic acid ethyl-ester 2%  
Nicotinic acid n-hexyl-ester 2%  
p-Aminobenzoic acid ethyl-ester 2%  
Water-miscible cream base ad 100%

*Therapeutische Umschau VIII, 1952, 16, 143

Transvasin is available in 1 oz. tubes, basic price 2/6 plus 9d. P.T., and is not advertised to the public. Samples and literature will be gladly sent upon application.

B-PAS PRODUCTS

These are now in unrestricted supply to provide the significant advantages of the newest clinically proven modification of PAS, i.e. B-PAS (4-Benzoylamino-2-hydroxybenzoic acid).

Extensive published reports based on the criteria of bacteriostatic levels, patient tolerance and clinical results show that B-PAS (Wander) is a major contribution to the chemotherapeutic armamentarium against tuberculosis.

Calcium B-PAS (Wander) is virtually insoluble; hence its slower absorption and excretion, and ability to provide high blood levels of extended duration, but with relatively low dosage. In contradistinction to other forms of PAS, B-PAS (Wander) is entirely free from unpleasant taste. It is thus acceptable to patients in easily taken powder form, as well as in cachets if preferred. The powder form is supplied in convenient single-dose envelopes, or in bulk in any quantity.

PACKS—Powder: Tins of 150 and 500 x 3.5 g. envelopes.
Cachets: ... 80 and 400 x 1.0 g.

Sodium B-PAS (Wander) also available in 1.5 g. Cachets

'B-PASINAH' combined B-PAS and Isoniazid (INAH)

To facilitate concurrent administration of B-PAS (Wander) and INAH, this product is formulated so that 12 Cachets daily in divided dosage provides 12 g. of Calcium B-PAS (Wander) plus 300 mg. of INAH.

PACKS—Cachets each containing 1 g. B-PAS (Wander) and 25 mg. INAH; Tins of 100 and 500.

Full Abstracts from Literature on B-PAS, also details of institutional quantities and prices sent on request.

All Wander tuberculostatic products may be obtained from usual pharmacists or direct from

Naphthionin
A new hæmostatic for intravenous or intramuscular injection

Used as a prophylactic ante-operatively and for the control of post-operative haemorrhage, NAPHTHIONIN reduces both bleeding and clotting times; and is of particular value where vascular fragility heightens the hæmorrhagic danger. NAPHTHIONIN does not control hemophilic bleeding, for which THROMBIN (MAW) is the hæmostatic of choice. With the use of NAPHTHIONIN, the attainment of a bloodless field in surgical procedures becomes practical and tolerance is excellent even where prolonged dosage is necessary. Supplied in boxes of 6x10cc. ampoules. A product of OM Laboratoires—Geneva. Prepared and distributed in Great Britain solely by S Maw Son and Sons Limited.

Maw's Ethical Products also include

HEMATRIX An ointment for the treatment of hæmorrhoids, pruritus ani, and all painful, inflammatory, pruritic, and eczematous lesions of the skin in the anal region. 
Prescriptible on B.O.18.

THROMBIN (MAW) A hæmostatic for topical use in surgical procedures for the immediate arrest of haemorrhage.

THROMBOPLASTIN (MAW) For reagent use in the determination of the prothrombin time in anticoagulant therapy.

RINARIDR (Cynamectic Acid Hydrazide) A new hydrazide for specific use in all forms of tuberculosis, particularly in chronic cases. Clinical trials in progress.

Safe, Reliable, Efficient

PENIDURAL, the safe oral suspension of penicillin, is a reliable weapon in the treatment of many infections. The penicillin is absorbed from the intestine and results in therapeutic blood levels in the patient which deal efficiently with the penicillin-susceptible organisms.

PENIDURAL Oral Suspension, is a palatable preparation and its administration by mouth is simplicity itself. One teaspoonful (5 c.c.) six-hourly is sufficient to deal successfully with most of the pathological processes caused by Streptococci, Staphylococci and Pneumococci.

PENIDURAL Oral Suspension contains 300,000 units Benzathine Penicillin to each large teaspoonful (5 c.c.) and is supplied in bottles containing 60 c.c.

Oral PENIDURAL is also available in tablets, each containing 200,000 units of Benzathine Penicillin.

Furadantin* for urinary tract infections

Furadantin is an antibacterial compound for the oral treatment of urinary tract infections only. Therapeutic concentrations up to 400 mcg./ml. appear in the urine but blood and tissue concentrations are very small. The drug is effective against most organisms found in the urinary tract, including Proteus and Aerobacter, and some strains of Pseudomonas.

Advantages

- Oral administration
- Action confined to urinary tract
- Broad antibacterial spectrum
- Only minor side-effects

Furadantin, N-(5-nitro-2-furfurylidene)-1-aminohydantoin, is available as tablets of 50 mg. in bottles of 25.

Further information on the use of Furadantin, or Diagnostic Tablets for bacterial sensitivity tests, will be sent on request.

CLINITEST and ACETEST

Reagent Tablets for the detection of

GLY COSURIA
KETONURIA

Both tests performed simultaneously in one minute!

'Clinitest' tablets have been widely used and prescribed since 1947. Many valuable hours have been saved. Following successful clinical trials, the makers of 'CLINITEST' have produced 'Acetest' reagent tablets for the detection of Ketonuria. Reliable routine sugar and acetone tests can now be carried out together in one minute!

'CLINITEST'
No external heating. No measuring of reagents.

'CLINITEST' HOSPITAL EQUIPMENT
An invaluable time-saver in wards and clinics. Write for details and hospital prices.

The advantages of 'ACETEST'

A single tablet provides all the reagents required. Low cost permits use as a screening procedure or as a routine for diabetic patients. No danger of false positives with normal urine. No caustic reagents.

1 Put 1 drop of urine on tablet.
2 Take reading at 30 seconds. Compare tablet to colour chart provided.
3 Record results as negative, trace, moderate or strongly positive.

Available under the N.H.S. on Form E.C.10. Basic Drug Tariff price 3/10 per bottle of 100 tablets (with colour scale).

ROCHE PRODUCTS LIMITED - 15 MANCHESTER SQUARE - LONDON - W.1
Cold, damp and smoke — just the right combination to produce the fog which sets people coughing and sends them to their doctor in search of relief.

And relief is readily available with ‘Phensedyl’, the M&B brand cough linctus which contains promethazine for its prolonged antihistamine, local analgesic and central sedative action, ephedrine for its broncho-dilator activity and codeine for its depressant effect on the cough reflex.

Whatever the cause of cough — whether it is “smog”, smoking, the aftermath of influenza, or a more serious condition — these properties of ‘Phensedyl’ usually bring relief. They provide the right combination.

_Supplied in bottles of 4 and 40 fl. oz._

(each fluid drachm [3.6 c.c.] contains:

- Promethazine hydrochloride: 0.5 mg.
- Cocaine phosphate: 0.3 mg.
- Ephedrine hydrochloride: 0.2 mg.)
countless words have been written

... concerning anaemia in all its aspects. Few subjects are so fully represented in the medical libraries of the world. Yet this vast store of knowledge counts for little unless it can be turned to practical advantage; and it is here that the Lederle range of anti-anaemia products has so much to offer the physician. No matter what the patient's need, there is a Lederle preparation to suit the case precisely.

Announcing

PIRITON

EXpectorant LINCTUS

At last it is possible to prescribe an effective expectorant linctus, containing a potent antihistamine, without the risk of undesirable side effects.

The advantages of Piriton, an improved antihistaminic, lie in its high potency, low dosage, low incidence of side effects, and high order of safety. Its combination with expectorants, in Piriton Expectorant Linctus, provides a cough linctus that is unsurpassed in therapeutic activity.

Piriton Expectorant Linctus is indicated in the treatment of all coughs, in children and adults, for which an expectorant is needed.

Each teaspoonful contains:

- Piriton (chlorprophenpyridamine) maleate 2 mg.
- Ammonium chloride B.P. 100 mg.
- Sodium citrate B.P. 44 mg.

TWO new products

MEGIMIDE
$$\beta$$-ethyl-$$\beta$$-methylglutarimide

and

DAPTAZOLE
$$2:4$$-Diamino-$$5$$-phenylthiazole hydrochloride

in Barbiturate Poisoning

"MEGIMIDE" is "a barbiturate antagonist of real clinical worth. To omit to use it in the treatment of barbiturate poisoning is to run the risk of the broncho-pneumonia that is so often fatal in these cases." (Lancet, 1955, i, 181.)

"DAPTAZOLE," itself a weak barbiturate antagonist, enhances the action of "Megimide."

"Megimide" and "Daptazole" administered together intravenously ensure safe, quick recovery from barbiturate intoxication without the risk of convulsions and secondary depression which often follow the use of other central analeptics.

in Morphine Administration

"DAPTAZOLE," the new morphine antagonist, has recently been shown (Brit. Med. J., 1955, i, 1367) to remove the risk of respiratory depression associated with high morphine dosage and to make tolerance or addiction unlikely.

"Daptazole" relieves respiratory depression by increasing the depth of respiration, while in some cases the vomiting and, in most cases, the constipation associated with morphine are also relieved.

in Barbiturate Anaesthesia

"MEGIMIDE" is of value to lighten or terminate the anaesthesia of patients under the influence of barbituric anaesthetics.

Further details and supplies of "Megimide" and "Daptazole" available to the medical profession on request.

Physiologic rehabilitation of the constipated bowel

1. Absorption of senna glycosides into blood stream with no effect upon stomach and small intestine

2. Excretion into large bowel — conversion into active principles

3. Activation of large bowel peristalsis via myenteric nerve plexus (Auerbach’s)

Neuro-muscular stimulation of the defaecation mechanism with restoration of natural rhythm

SENOKOT — the first standardised preparation of senna containing the total active constituents of the pod — is not a laxative in the usual sense. It restores large bowel sensitivity and reflex evacuation — without mucosal irritation. In the treatment of chronic constipation the dose required to give a comfortable formed motion is administered regularly, and as natural rhythm is established dosage is gradually reduced and finally discontinued.

Prescribed under the N.H.S.:
J.C.P. Category 3; inexpensive; not advertised to the public.

Senokot is sold in Gt. Britain, U.S.A., Canada and in many other countries

Granules: 1-2 teaspoonfuls. Tablets: 2-4
GRANULES: 2 oz., 6 oz. and 2 lb. TABLETS: 50, 200 and 1,000.
A New Highly Potent Analgesic

‘Pipadone’ brand Injection of Dipipanone Hydrochloride is a new synthetic analgesic, developed at The Wellcome Research Laboratories. In contrast to methadone (‘Physeptone’), of which dipipanone is the piperidino analogue, it has a marked sedative and hypnotic action. It appears to be largely free from euphoriant effect and, at the recommended dosage level, seldom causes other side-reactions.

‘Pipadone’ is indicated for relief of pain when sedation also is desirable. Clinical trials have shown it to be specially valuable in the management of post-operative pain; in ano-rectal surgery; in the removal of surgical dressings; and in carcinomatosis, particularly with bony metastases. Injected intramuscularly, the drug exerts its effect in about sixteen minutes. Six-hourly or twice-daily doses have been found adequate in even the severest types of pain.

The usual dose of ‘Pipadone’ is 25 mgm. (approximately equivalent to gr. 1/6 of morphine). Tolerance is not easily acquired. ‘Pipadone’ is issued in ampoules of 25 mgm. in 1 c.c., in boxes of 12 ampoules, priced at 10/6 (exempt from purchase tax), subject to the usual discounts.

‘Pipadone’
Injection of Dipipanone Hydrochloride

A New treatment
for Peptic Ulcer
complicated by
Mental Stress and Anxiety

Because many conditions of peptic ulceration are complicated by mental stress, anxiety and nervousness, the Searle Research Laboratories have combined the anticholinergic properties of "Pro-Banthine" with the sedative properties of phenobarbitone on the central nervous system in tablets containing 15 mg. of each.

Phenobarbitone suppresses parasympathetic stimuli at their origin while "Pro-Banthine" forms a block at the autonomic ganglia and at parasympathetic nerve endings. Thus "Pro-Banthine" with Phenobarbitone is an example of rational therapeutics, promoting calm serenity with speedy relief from ulcer pain.

"Pro-Banthine" with Phenobarbitone is as safe as "Pro-Banthine" alone, the side-effects being exactly similar and as easily controlled. Only rarely is sleep induced by the phenobarbitone, and even then seldom during working hours. Dosage of "Pro-Banthine" with Phenobarbitone is the same as "Pro-Banthine" alone, usually one or two tablets t.i.d. with meals and two tablets at bedtime as required. "Pro-Banthine" with Phenobarbitone is available in bottles of 100 and 1,000 tablets.

MARMITE
yeast extract

in Preventive Medicine

The prominent part played by diet in preventive medicine is now fully recognised. A well-balanced diet can contribute markedly to general good health and, conversely, a faulty diet can precipitate illness and hinder recovery. Marmite is a useful protective food providing the important B vitamins in a convenient and appetising form.

in Restricted Diets

In the dietary control of obesity, diabetes or other conditions a reduced intake of vitamins may lead to complications. Addition of Marmite to these restricted diets supplements their content of B vitamins and adds flavour to meals which are apt to be dull and uninteresting.

MARMITE LIMITED, 35, SEETHING LANE, LONDON, E.C.3

THE EXTRA PHARMACOPOEIA
(Martindale)

Volume II 23rd Edition

The second volume of the Extra Pharmacopœia supplements the information in the first volume published in 1952, the two volumes forming a comprehensive work of reference on materia medica and allied subjects. The whole book has been revised, rewritten and reset. It has been compiled for general practitioners in pharmacy and medicine, for specialists and experts engaged in associated activities, for research workers and for students. The sections dealing with the analysis of drugs, clinical biochemistry, and bacteriological notes have been extended.

A descriptive Leaflet is available.

Pp. xxix+1501. Price 57s. 6d. (postage 1s. 6d.)

THE PHARMACEUTICAL PRESS

17, Bloomsbury Square, London, W.C.1
New high performance specification and new power-braking for the 90. Greater comfort in all three models: the 60, 75 and 90.

THE NINETY

HIGH PERFORMANCE By increasing the compression ratio, the acceleration has become still more vivid. An optional overdrive ensures a higher maximum speed, exceptionally fast and silent cruising at low engine speeds and a useful saving in petrol consumption. Top gear flexibility, so valuable when driving in traffic, is unaffected.

EXTRA SAFETY To match this livelier performance, a new Servo-assisted braking system is introduced. This ensures impressive light-pressure stopping from high speeds and maximum safety under modern road conditions.

THE SIXTY, SEVENTY-FIVE AND NINETY

EXTRA COMFORT Rover cars have a fine reputation for driver and passenger comfort. There is now a choice of two styles in the front seating—a bench type seat or, as an optional extra, two individual seats independently adjustable. The deep hide upholstery is pleated to retain its shape and the rear arm rests have been redesigned for greater comfort.

Prices including purchase tax: '60': £1261.17.0; '75': £1303.17.0; '90': £1418.17.0 (overdrive, optional extra)
A new
cough specific

BECANTYL

(Sodium 2:6 ditertiarybutyl-naphthalene monosulphonate)

Suppresses cough with
no undesirable side effects

Sodium 2:6 ditertiarybutyl-naphthalene monosulphonate (Becantyl), a product of original research, is a new agent that is specific in suppressing cough. It is unrelated to morphine and guaiacol.

BECANTYL does not cause constipation, anorexia, drowsiness or any other undesirable side-effects; being devoid of side-effects, BECANTYL may be prescribed for children and the aged.

Clinical experience supports the value of BECANTYL in suppressing all types of cough, BECANTYL may be prescribed whenever the treatment of cough is indicated.

BECANTYL is presented in 4 fluid ounce, 40 fluid ounce, and 80 fluid ounce bottles.

LIL-LETS
the new vaginal tampon
without applicator

A tampon which has been successfully marketed on the Continent during the last five years has now become widely accepted in this country under the name LIL-LETS.

Following extensive clinical trials, LIL-LETS have won the support of leading gynaecological opinion. Samples will be sent to medical practitioners on request.

LIL-LETS have these main advantages:

- **LIL-LETS need no applicator.** By inserting the tampon with the fingers, the risk of bruising is eliminated.
- **LIL-LETS assist personal hygiene.** At 1/6 for 10 they are so much cheaper than other leading tampons that women will be encouraged to change them often. They are easily carried about and easily disposed of.
- **LIL-LETS are highly absorbent.** They absorb almost ten times their own weight in moisture and swell sideways, not lengthways. They are, therefore, really safe.
- **LIL-LETS are individually wrapped.** Each tampon is sealed in a transparent cover. There is no risk of soiling or infection when it is carried loose.

LIL-LETS

Elastoplast Bandaging Technique

in the treatment of

Post-Operative Conditions

SURGERY is a field in which Elastoplast elastic adhesive bandages are widely used with marked success. The illustration shows the ‘stole’ method of applying Elastoplast to the neck after operation in that region, e.g. thyroidectomy. It is an efficient method of retaining dressings in position and saves time, trouble and discomfort to the patient.

SOME OF THE MANY OTHER USES OF ELASTOPLAST IN MEDICAL PRACTICE

To reduce umbilical and inguinal hernia in children

* Support, and control of effusion, in joint injuries

* To retain a dressing in position on the head

* Fixation of empyema tubes, catheters and intravenous drips

* Compression treatment of leg ulcers

* To close the edges of a gaping wound

Elastoplast elastic adhesive bandages (Porous) B.P.C. are available in 3 yard lengths and 2", 2½", 3" and 4" widths. Prescribable on Form E.C.10.

The key
to successful
peptic ulcer

treatment

NULACIN

Nulacain effectively controls gastric acidity. The value of Nulacain in the treatment of peptic ulcer and the prevention of relapse has been confirmed by clinical studies in Great Britain, Australia, the U.S.A. and India. Nulacain tablets are palatable and convenient.

INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

SOBRANIE CIGARETTES TOBACCOS

TWO ORIGINALS—it is a bold claim! Yet consider the facts—one a Smoking Mixture which combines the rarest Yemenite with choicest Virginian; another a Virginia Tobacco whose added touch of genius is a touch of finest cigar leaf. The surnames of both are the same—Balkan Sobranie. In the one or the other of these two famous brands is the final answer to present discontents and a friendship that will last a lifetime. Neither may be everybody’s choice—the House of Sobranie is well content in a mass market world to continue to provide selective smoking pleasure for the discriminating few.

BALKAN SOBRANIE TOBACCOS

Balkan Sobranie pipe Tobaccos are priced at 2 1/2d. per ounce in vacuum sealed tins and are made by the House of Sobranie. Write for new catalogue to SOBRANIE LIMITED 136 City Road London E.C.1
The value of Ice Cream in invalid dietary

A large number of hospitals in this country include ice cream in their invalid dietaries. Its palatability is a strong recommendation. The very nature of good ice cream, combining as it does the qualities of a food with the appeal of a treat, makes it acceptable to patients, even where there is little or no appetite for other types of food.

Good ice cream has a high fat and carbo-hydrate content. Its calorific value also is high, and it is assimilated easily and rapidly.

---

WALL'S ICE CREAM

—the palatable, nourishing and easily assimilated food, rarely contra-indicated

---

The nutritive values of Wall's Vanilla Ice Cream are shown by this analysis of its contents:

- FAT 12.5%
- CARBOHYDRATES 19.5%
- PROTEIN 4%
- CALORIES 206 per 100 grm.
Recent reports suggest that Seconesin is proving particularly useful for the control of tension symptoms associated with menstruation and the climacteric. Seconesin in a dose of one tablet every four to six hours exerts a relaxing and mild sedative effect without making the patient drowsy. In this way, symptoms frequently can be controlled whilst the patient is perfectly capable of carrying on her normal occupation.

British Medical Association

Annual Scientific Meeting at Brighton
JULY 9-13, 1956

SCIENTIFIC EXHIBITION

During the Annual Scientific Meeting of the British Medical Association at Brighton next year there is to be an exhibition demonstrating medical work in progress. This exhibition offers a unique opportunity to medical men and women to show their work and to make contact with all sections of the profession.

These annual meetings are the largest scientific meetings of the whole profession in this country and attract many visitors from overseas.

Stands will be provided for the display of exhibits. As space is limited all those interested should write as soon as possible to the Secretary, B.M.A. House, Tavistock Square, London, W.C.1. The last date for receipt of applications is December 31, 1955.
APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

**SERVICE MEMBERS** may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civil appointment.

Visiting medical practitioners who are liable for National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

**SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF**

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £865 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for at least one year: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,240 per annum in the third year; £1,400 per annum in any other year.

(Any other Grades, Whole-time)

(a) **HOUSE OFFICERS**:

(i) **Provisionally registered medical practitioners**: £425 per annum for the first post held; £475 per annum for the second and all subsequent posts held.

(ii) **Registered medical practitioners**: £625 per annum for the first post held; £725 per annum for the second and all subsequent posts held.

Provided that the employing authority (subject in the case of a hospital management committee) of a local hospital board or boards shall have discretion to determine that the remuneration or any officer holding his first post in the National Health Service as a House Officer shall be £475 per annum if they are satisfied that the officer has held at least one hospital post outside the present establishment, and involving clinical responsibilities equivalent to those of house posts in the National Health Service and supervised by appropriate specialist staff.

(5) Posts obtained normally not less than one year after registration as a medical practitioner and held normally for one year: £745 per annum.

(6) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year in any Grade, after registration as a medical practitioner and normally held for one year: £745 per annum.

(7) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of a similar grade: £775 (for an officer who has held not less than one year after full registration as a medical practitioner) by £50 to £775.

**ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS are in accordance with the terms and conditions of service of national health service medical staff**

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications; where this is not stated in the advertisement.

**(25 1/55)**

**PRACTICES (Executive Councils)**

For vacancies (except those in Scotland) apply on Form E C.16A to the Registrar of the Executive Council. Mark envelope "Vacancy".

**BIRMINGHAM, Lozells**

Applications invited for vacancy (Urban) due to death. List approximately 1,700. Residence surgery may be provided. Apply, on Form E C.16A, not later than December 3, 1955, to the undersigned:-

E. D. Day, of Birmingham Executive Council, Sutton New Road, Erdington, Birmingham, 5.

**(5221)**

**HADLEY, N. Wellingborough, Shropshire**

Applications are invited for a vacancy at Hadley, near Wellingborough, Shropshire. There is no list. But the successful applicant will be granted the initial practice allowance, if eligible. The population of the area is approximately 4,000 and is a healthy area.<br>

There is no resident doctor in the town. Apply, on Form E C.16A, before December 3, 1955, to:-

E. R. Moore, Consul of the Salop Executive Council, Ashby-d'Alber, Shrewsbury.

PERCIVAL TURNER, LTD.

MEDICAL AGENCY (Est. 75 years)

For Nasal Decongestion...

Discriminate use of the Neophryn Spray helps to restore normal nasal function and is probably the best short-term local treatment. Principal advantages are: rapid and prolonged vasoconstriction without secondary congestion, virtual freedom from side-effects and simple administration by a convenient plastic atomiser. Neophryn is also available as Nasal Drops (especially suitable for children) in a half-ounce bottle with dropper.

The Neophryn Spray is also available with Antihistamine.

Basic N.H.S. cost of Neophryn Drops or Spray, 2s. 4d., Neophryn with Antihistamine, 2s. 8d.

Manufactured by BAYER PRODUCTS LIMITED Neville House, Kingston-on-Thames, Surrey
