SALT'S ILEOSTOMY APPARATUS

This modification of the Koenig-Rutzen ileostomy set has been used extensively, both in this country and abroad. Light and inconspicuous, it gives the wearer a feeling of security, saves the use of dressings, and prevents soiled clothes and bed linen. All parts replaceable.

SALT'S WET COLOSTOMY APPARATUS
For cases where one or both ureters have been transplanted into a sigmoid terminal colostomy the Salt Wet Colostomy Appliance and detachable bag is recommended. Details will be sent on application.

Transvasin
brings the esters of NICOTINIC ACID
SALICYLIC ACID
p-AMINOBENZOIC ACID
to the focal point of
soft-tissue rheumatism

The esters in Transvasin, a new
preparation developed by Hamol
S.A., our Swiss associates, readily
pass the skin barrier in therapeutic
quantities and enable an effective
concentration of the drugs to be
built up where they are needed.
Transvasin not only induces vasodilation
of the skin with a superficial erythema, but also brings
about a deep hyperaemia of the
underlying tissues. It is non-
irritant, and can be safely used on
delicate skins.
It is now being widely prescribed,
with successful clinical results.
Since a very small quantity is
sufficient for each application, the
cost of treatment is extremely low.

Transvasin is available in 1 oz. tubes, basic price 2/6
plus 7½d P.T. and is not advertised to the public.
Samples and literature will be gladly sent on
application.

LLOYD-HAMOL LTD., 11 Waterloo Place, London, S.W.1 WHitehall 8654/5/6

'Murder of Thomas Arden of Faversham', Feb. 15th, 1559

This is an illustration, albeit a rather immoral one, of the principle of Successive and Complementary Action—known vulgarly as the 'You hold him and I'll hit him' technique. Unscrupulous, unfair, and ungentlemanly, it has only one worthwhile quality. It works.

After a careful perusal of Whitaker's Almanac, The Sportsman's Guide, and the Rules of the Hunt, we can find no reference either to a close season, or to restrictive Rules of The Chase, for bacteria.

Emboldened by this we have produced 'Eskacillin' 200 Sulpha. This palatable liquid presentation of penicillin and sulphadimidine utilizes the principles of Successive and Complementary Action as basely—and as successfully—as the two gentlemen in the picture.

'Eskacillin' 200 Sulpha
A New SKF Product

Contains 200,000 I.U. penicillin and 0.5 g. sulphadimidine per standard medical teaspoonful (1 fl. drachm = 3.5 ml.) Available for prescription in ½ fl. oz. bottles

Yes, this is a case for Ichthopaste!

Ulceration of the leg with associated eczema... yes, this is a case for Ichthopaste! But this is only one of the complete range of Smith & Nephew paste bandages available (on E.C.10) to the Medical Profession. The paste content of these bandages is particularly high, being four times the weight of their fabric base.

**Ichthopaste**

_ZINC PASTE AND ICHTHHAMMOL BANDAGE B.P.C._
This bandage contains 2% of Ichthammol. It is indicated for eczematous conditions associated with leg ulceration, particularly when the eczema is of the weeping type. The bandage never sets harder than its original spongy state which gives a resilient dressing. An Elastocrepe or Elastoplast bandage may be applied to give firm elastic support.

**Viscopaste**

_ZINC PASTE BANDAGE B.P.C._
A zinc paste bandage which requires no preliminary heating and is ready for immediate use on removal of the waterproof wrapper. Viscopaste sets quickly, forming a thin shell and is indicated for eczematous conditions and also as a support for the leg following the removal of P.O.P. casts.

**Cotapaste**

_ZINC PASTE AND COAL TAR BANDAGE B.P.C._
Made from light cotton fabric, evenly impregnated with a water miscible coal tar zinc oxide paste. Cotapaste is indicated for the dry, scaly, itching type of eczema associated with varicose conditions, infantile eczema and neurodermatoses. Here is an ideal medium for the application of prepared coal tar to the skin, wherever its use is indicated.

_Welwyn Garden City, Herts_
New research on Procidets proves their amazing effectiveness in the treatment of streptococcal and other throat infections

Newly evolved techniques have convincingly established the value of PROCIDETS in practice.

It has been demonstrated that four Procidets sucked in succession destroy most of the bacteria and fungi in the mouth.

Procidets are fully effective against bacterial and fungal infections of the throat and mouth and clinical trials on hundreds of cases of severe tonsillitis, pharyngitis and stomatitis resulted in 95% cures in 48 hours.

Procidets contain no antibiotic. They are non-toxic and cannot build up resistant strains.

Procidets v Penicillin
Comparative effect on ORAL BACTERIA

These photographs are of representative plates showing the dramatic action of Procidets in comparison with Penicillin Lozenge B.P.

Each 1 gramme lozenge contains:

Cetyl Pyridinium Chloride .............. 4 mg.

Pye Telecommunications announce a

NEW TWO-WAY RADIO EQUIPMENT

Demonstrations of a new equipment, designed in Cambridge, have been given in London recently to representatives of Police and Fire Services, Local Authorities and Industrial Organisations. This equipment has been designed to defeat the chronic shortage of two-way radio channels.

Known as the Pye "Ranger" it is the solution to the frequency shortage which is hamstringing mobile radio users in Great Britain!

The new equipment operates on a channel spacing of only 25Kc/s—a quarter of the customary spacing—thus potentially quadrupling the number of mobile radio channels. Robust construction, excellent performance and carefully selected components make it capable of operating under arduous conditions and in any weather.

This mobile radio is designed for fitting in the dashboard of ordinary cars and vehicles. The price of the equipment, notwithstanding its many-times improved specification, is approximately the same as that of earlier equipments which it now replaces.

Drip therapy without a tube

NULACIN

In the past, the successful treatment of many cases of peptic ulceration demanded hospital conditions. Now, by means of Nulacin Tablets, it is possible to control gastric hyperacidity without any inconvenience to the patient. By using Nulacin Tablets as directed, an ambulant patient can obtain all the advantages of intragastric milk-alkali drip therapy.

INDICATIONS

NULACIN tablets are indicated whenever neutralization of the gastric contents is required: in active and quiescent peptic ulcer, gastritis, gastric hyperacidity.

Beginning half-an-hour after food, a NULACIN tablet should be placed in the mouth and allowed to dissolve slowly. During the stage of ulcer activity, up to three tablets an hour may be required. For follow-up treatment, the suggested dosage is one or two tablets between meals.

NULACIN tablets are not advertised to the public, have no B.P. equivalent, and may be prescribed on E.C.10. The dispensing pack of 25 tablets is free of Purchase Tax. (Price to pharmacists is 2/-.) Also available in tubes of 12.

NULACIN tablets are prepared from whole milk combined with dextrins and maltose, and incorporate Magnesium Trisilicate 3.5 grs.; Magnesium Oxide 2.0 grs.; Calcium Carbonate 2.0 grs.; Magnesium Carbonate 0.5 grs.; Ol Menh. Pip q.s.

GASTRIC ANALYSIS Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer

The problem of the recurring 30 per cent

The time and trouble involved in dealing
with the psychoneurotic patient is a
constantly recurring problem in general
practice. Oblivon is an entirely new drug
which is specific for the reduction of
nervous tension and the physiological
accompaniments of fear and anxiety.

Administered three times a day it has
a tranquillising effect on the anxious
patient, reducing the mental tension and
controlling the multiple physical symptoms
of which the patient complains.

Unlike the amphetamines and the barbiturates, Oblivon is an entirely safe
preparation. There are no contra-indica-
tions to the use of Oblivon, and it may
confidently be given even to patients with
cardiac, renal or hepatic disease.

SYRIAC AMULET

This ancient amulet shows the Angel Gabriel mounted on a white horse driving his spear into the body of the devil-woman of the Evil Eye. It was considered to preserve mankind from attacks of devils.

TODAY staphylococcal, streptococcal and pneumococcal infections are attacked by the selective action of ERYTHROCIN. Tissue-thin Filmtab starts to disintegrate within 30 seconds—makes ERYTHROCIN Stearate available for immediate absorption. Tests show Stearate form definitely protects drug from stomach acid. Patients get high inhibitory blood levels of ERYTHROCIN in 2 hours or less. Peak concentration is reached at 4 hours, with significant levels for 8 hours. Low in toxicity ERYTHROCIN is less likely to alter normal intestinal flora than most other antibiotics. ERYTHROCIN 100 or 200 mg. Filmtabs are available in bottles of 25 and 100.

For little patients 60 cc. bottles of ready-to-use Oral Suspension.

'Aerosporin'
SPECIFIC AGAINST MANY
GRAM-NEGATIVE ORGANISMS

'Aerosporin' brand Polymyxin B Sulphate is an antibiotic pre-eminent against Pseudomonas pyocyanea and is strongly and quickly lethal to many other gram-negative organisms. Used locally, it encourages healing of wounds or burns and facilitates skin-grafting. Intrathecally, it is given in the treatment of meningitis caused by certain gram-negative species. In systemic or urinary infections it is injected intramuscularly. In otitis externa and chronic otitis media due to Ps. pyocyanea, 'Aerosporin' is specific and should be administered as 'Aerosporin' Otic Solution. 'Polyfax', an ointment combining bacitracin with polymyxin B sulphate, is also available; lethal to both gram-positive and gram-negative organisms, it carries minimal risk of sensitisation.

BURROUGHS WELLCOME & CO. (THE WELLCOME FOUNDATION LTD.) LONDON
Associated Houses: AUCKLAND BOMBAY BUENOS AIRES CAIRO CAPE TOWN DUBLIN KARACHI MONTREAL NEW YORK RIO DE JANEIRO SYDNEY
FOR MILD FORMS OF PAIN

Background to Tercin "Aspirin and phenacetin are effective and useful, and a sedative effect is obtainable if a barbiturate is combined with them... The reputation of codeine as a pharmacologically useful drug is at present waning, for the analgesic effect of the compound table of codeine B.P. is probably due more to its content of aspirin and phenacetin than to the ⅛ gr. (3 mg.) of codeine present. It is a weak analgesic even when given in full doses."

Tercin combines aspirin and phenacetin with butobarbitone. It is indicated for the relief of mild forms of pain for which tablets of aspirin, phenacetin and codeine have hitherto been prescribed. An important aspect of Tercin therapy is that it does not cause constipation. Tercin is available in tablets containing aspirin 5 grains, phenacetin 3 grains and butobarbitone ¼ grain. Basic N.H.S. price. Bottles of 200 at 4/10.

DOSAGE: One or two tablets as required. A total dose of eight tablets daily should generally not be exceeded.

Literature and samples are available on request to the Medical Department

Physiologic rehabilitation of the constipated bowel

1. Absorption of senna glycosides into blood stream with no effect upon stomach and small intestine

2. Excretion into large bowel—conversion into active principles

3. Activation of large bowel peristalsis via myenteric nerve plexus-(Auerbach’s)

Neuro-muscular stimulation of the defaecation mechanism with restoration of natural rhythm

SENOKOT—the first standardised preparation of senna containing the total active constituents of the pod—is not a laxative in the usual sense. It restores large bowel sensitivity and reflex evacuation—without mucosal irritation. In the treatment of chronic constipation the dose required to give a comfortable formed motion is administered regularly, and as natural rhythm is established dosage is gradually reduced and finally discontinued.

Prescribed under the N.H.S.:
J.C.P. Category 3; inexpensive; not advertised to the public.

Senokot is sold in Gt. Britain, U.S.A., Canada and in many other countries

Granules: 1-2 teaspoonsfuls. Tablets: 2-4
GRANULES: 2 oz., 6 oz. and 2 lb. TABLETS: 50, 200 and 1,000.
Aftermath-

Precise diagnosis, specific therapy promptly applied, rapid and satisfactory response . . . a desirable sequence of events in the management of any acute infection.

Yet, before the case can be considered as finally closed, the question of dealing with the aftermath—physical and mental asthenia—must be resolved.

Post-infective debility connotes a legacy of high nitrogen loss which plays an important role in the causation of the varied subjective manifestations covered by the general term, asthenia. Since, too, only very small amounts of protein are stored in the body, the advisability of ensuring a particularly high intake of essential amino-acids during convalescence is obvious.

Sanatogen is the restorative tonic nutrient of choice. Sanatogen is a protein complex rich in the essential amino-acids with 5% of glycerophosphate.

The protein moiety, apart from its high nutrient value, has an intrinsic tonic effect on the depleted tissues and plays a part in the production of antibodies, in the formation of haemoglobin and in preserving the integrity of the liver. This tonic effect is, moreover, augmented by the glycerophosphates, long accepted as an efficient nerve and general tonic.

For over fifty years Sanatogen has been used successfully for physical and mental debility after acute infections or major operations. It has also produced excellent results as an adjunct to simple psychotherapy in the protein psychosomatic manifestations which make up such an important part of general practice.

BARBITURATE AND MORPHINE ANTAGONISTS

TWO new products

MEGIMIDE
\( \beta \)-ethyl-\( \beta \)-methylglutarimide

and

DAPTAZOLE
2:4-Diamino-5-phenylthiazole hydrochloride

"MEGIMIDE" is "a barbiturate antagonist of real clinical worth. To omit to use it in the treatment of barbiturate poisoning is to run the risk of the broncho-pneumonia that is so often fatal in these cases." (Lancet, 1955, i, 181.)

"DAPTAZOLE," itself a weak barbiturate antagonist, enhances the action of "Megimide."

"Megimide" and "Daptazole" administered together intravenously ensure safe, quick recovery from barbiturate intoxication without the risk of convulsions and secondary depression which often follow the use of other central analeptics.

"DAPTAZOLE," the new morphine antagonist, has recently been shown (Brit. Med. J., 1955, i, 1367) to remove the risk of respiratory depression associated with high morphine dosage and to make tolerance or addiction unlikely.

"Daptazole" relieves respiratory depression by increasing the depth of respiration, while in some cases the vomiting and, in most cases, the constipation associated with morphine are also relieved.

"MEGIMIDE" is of value to lighten or terminate the anaesthesia of patients under the influence of barbituric anaesthetics.

Further details and supplies of "Megimide" and "Daptazole" available to the medical profession on request.

THE TREATMENT OF

PEPTIC ULCER

WITH “ROTER” TABLETS

Extract from the British Medical Journal, 1st October 1955, p.827

"The immediate clinical results were assessed after the first month’s treatment in four main groups: (A) pronounced relief (symptom free); (B) definite relief (minor symptoms with no pain); (C) doubtful relief (symptoms persisting but improved); (D) no relief.

"...81% of cases became symptom free—70% of them during the first week and 30% during the second week; a further 9% were relieved of the majority of their symptoms. Thus there was a satisfactory response in 90% of cases.

"Four of the nine cases in groups C and D have elected to go to surgery, and one of the remaining cases has a hiatus hernia as well as a duodenal ulcer. Experience of treating these ‘failures’ over the past six years leads one to believe that no form of medical treatment will be effective and that surgery is the only hope of relieving their symptoms. In 75% of the cases the patients were of the opinion that the tablets were superior to alkaline powders, and they found that they were able to take foods which they had avoided for years.

"The treatment is ideal for general practice, where its simplicity appeals to both patient and doctor, and, although its mode of action remains an unsolved problem, this should not deter its use in a condition the cause of which remains a riddle. Finally, while the possibility of toxic effects does arise, none has been reported or found in this series; but, as a precaution, the tablets should not be administered to young children."

FORMULA:
Magnesium Carbonate (400 mg.), Bismuth Subnitrate (350 mg.), Sodium Bicarbonate (200 mg.), Rhizoma Calami (25 mg.), and Cortex Rhhamn Prunusae (25 mg.)

Roter tablets are prescribed on N.H.S. They are not advertised to the public.
Packings: Tins of 40, 120, 640; and dispensing size, 720 (P.T. Exempt.)

Samples and literature on request.

3 new forms of ACHROMYCN

Give you wider choice in prescribing

Here are three new presentations of ACHROMYCN enabling you to choose precisely the preparation best suited to the patient's needs. The growing popularity of this outstanding antibiotic is due to several merits—not the least of which are its unsurpassed antibacterial range and its remarkable freedom from side effects. Today there is a form of ACHROMYCN to meet every prescription requirement.

*Regd. Trade Mark

- ACHROMYCN Troches, 15 mg. Provide rapid and effective control of bacterial infections of the throat and mouth.
  Bottles of 25.

- ACHROMYCN Ophthalmic Sterilized, 25 mg.
  To arrest infection in the conjunctiva and deeper structures of the eye; and to prevent infection in traumatic and surgical injury. Vial of powder with sterilized dropper vial.

- ACHROMYCN Syrup, 125 mg./5 cc. Ideally suitable for children, convalescents and others unwilling or unable to take ACHROMYCN in capsule or tablet form. Bottle of 2 fl. oz.

Save time on Urine tests with . . .

**CLINITEST and ACETEST**

Reagent Tablets for the detection of

**GLYCOSURIA**

**KETONURIA**

Both tests performed simultaneously in one minute!

"Clinitest" tablets have been widely used and prescribed since 1947. Many valuable hours have been saved. Following successful clinical trials, the makers of "CLINITEST" have produced "Acetest" reagent tablets for the detection of Ketonuria. Reliable routine sugar and acetone tests can now be carried out together in one minute!

"CLINITEST"

No external heating. No measuring of reagents.

Approved by the Medical Advisory Committee of the Diabetic Association.

Available under the N.H.S. on Form E.C.10.

(Basic Drug Tariff Prices: Set 6(8d. complete. Refill bottles of 36 Tablets 2/4d.)

"CLINITEST" HOSPITAL EQUIPMENT

An invaluable time-saver in wards and clinics. Write for details and hospital prices.

---

The advantages of "ACETEST"

A single tablet provides all the reagents required. Low cost permits use as a screening procedure or as a routine for diabetic patients. No danger of false positives with normal urine. No caustic reagents.

1. Put 1 drop of urine on tablet.
2. Take reading at 30 seconds. Compare tablet to colour chart provided.
3. Record results as negative, trace, moderate or strongly positive.

Available under the N.H.S. on Form E.C.10. Basic Drug Tariff price 3/10 per bottle of 100 tablets (with colour scale).

CHANGE OF NAME

Following the merging of the interests of Merck & Co. Inc. with those of Sharp & Dohme Inc., the name of Sharp & Dohme Ltd. has been changed to —

MERCK-SHARP & DOHME LIMITED

The combined companies, now forming one of the leading world organisations for the promotion of pharmaceutical and medical research, have been responsible for many advances in the vitamin, sulphonamide, and steroid fields. With the extensive facilities now available it is confidently expected that further major contributions to medicine will be forthcoming.

MERCK-SHARP & DOHME LIMITED, HODDESDON, HERTS
The Junior Aspirin is Angiers

Specially made for children

Doctors, dentists and nurses welcome Angiers Junior Aspirin, for it is recognised in both surgery and hospital ward as the anti-pyretic sedative for children. Convenient, safe and accurate in dosage, Angiers Junior Aspirin is readily taken by the youngest patient.

- Pleasant to take. The tiny pink tablets are sweetened and orange flavoured . pleasant to suck or chew, easy to swallow, and promptly effective since they disintegrate as rapidly in the stomach as they do in milk or water.

- Protection against gastric-irritation. Each tablet contains exactly 1.25 grains of pure Acid Acetylsalicylic, with 1.50 grains 'Di-calcium Phosphate to check 'salicylic-irritation' of sensitive stomachs.

Manufactured under close pharmaceutical supervision in the Laboratories of
THE ANGIER CHEMICAL CO. LTD., LONDON, S.E.1.

* SEBORRHOEA

* PSORIASIS OF THE SCALP

+ DANDRUFF

Sebbix

+ SEBBIX SHAMPOO

An effective but safe shampoo for removing scale in cases of seborrhea and psoriasis of the scalp. Contains 1% hexachlorophene and purified fraction equivalent to 2% crude coal tar in a soapless shampoo base.

A stimulant and antiseptic preparation which quickly controls dandruff while being an ideal shampoo for routine use. Should not be prescribed on E.C.10, but retail price of a bottle sufficient for 6—8 good shampoos is only 3/6.

* SEBBIX CREAM

A safe treatment for seborrhea and psoriasis of the scalp. Contains 2% salicylic acid, 3% sulphur and purified fractions equivalent to 10% crude coal tar in a water miscible base. Sebbix has no unpleasant odour and is readily acceptable to female patients since it does not mat or clog the hair.

Prescribable on E.C.10
Basic N.H.S. cost per 1 oz. tube 2/6.

Summer starting all through the winter

AND 80% LESS ENGINE WEAR

with BP Special Energol ‘Visco-static’ Motor Oil

You know what starting your engine is like on a warm summer morning. Just press the button and away she goes. Running easily, freely, ready to bound ahead at the touch of the throttle. This is because the engine oil is so much thinner in summer than in winter.

Now you can have this kind of starting all through the winter. All you need to do is change to BP Special Energol ‘Visco-static’ motor oil. This all-the-year-round oil is extra thin when cold yet it has ample body when hot to protect your engine under all conditions.

You get complete oil circulation from the moment your engine starts even in hard frost. This cuts out the main cause of cylinder bore and piston ring wear. As a result you reduce wear on bores and piston rings by 80%.

BP Special Energol saves petrol too by reducing oil drag in your engine. In start and stop running savings can be up to 12%. In normal running you save up to 5%.

Add up the benefits — easier starting, much less wear and saving in petrol. A change to BP Special Energol will transform your winter motoring. Decide to change now. But it must be a complete change. First have the engine drained and refilled, then run 500 miles and change again. After that revert to the normal change periods for your engine.

Do not use BP Special Energol if your engine is worn and in need of an overhaul. For such cars the suitable grade of normal BP Energol is the best choice.

BP Special Energol is obtainable at garages where you see the BP Shield, in pint, quart and 1 gallon sealed containers.

BP Special Energol ‘Visco-static’ has been tested and approved by most British Car Manufacturers.
FOR GERIATRIC PATIENTS
safe, comfortable, effective
HERNAL SUPPORT

Because each Spencer Support is designed to order to meet the patient's individual needs, results are demonstrably superior.

The patient shown on left, aged 74, developed a left ventral hernia following surgery fourteen years previously. A left inguinal hernia resulted from the long wearing of a cast following a hip injury 3 years ago. "Stock" supports proved ineffective. A Spencer Support as shown was prescribed with excellent results. Her Spencer gives safe, comfortable and effective control of the hernias—improves and maintains posture—protects and supports the weak muscles of old age. With the aid of her Spencer, the patient runs her household, does all her own work, and—as she says—still has time "to enjoy life."

Prescribe Spencer with confidence for men, women, children—for abdomen, back, breasts. No case is too difficult for Spencer Designers!

Brand’s Essence
(BEef OR CHeNClE)

When nourishment is the main problem...

Brand’s Essence is a first-class protein of animal origin, in a form and strength that will not overtax a weakened system. Being partly hydrolyzed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

The major indications for the administration of Brand’s Essence are loss of appetite during fatigue, acute infections, and dysphagia or digestive disturbances due to organic or bacterial lesions of the mouth, oesophagus and alimentary tract, and after surgical procedures.

The addition of Brand’s Essence to low residue and weight-reducing diets is especially appreciated by the patient.

The value of Ice Cream in invalid dietary

A large number of hospitals in this country include ice cream in their invalid diets. Its palatability is a strong recommendation. The very nature of good ice cream, combining as it does the qualities of a food with the appeal of a treat, makes it acceptable to patients, even where there is little or no appetite for other types of food.

Good ice cream has a high fat and carbo-hydrate content. Its calorific value also is high, and it is assimilated easily and rapidly.

—WALL'S ICE CREAM

—a palatable, nourishing and easily assimilated food, rarely contra-indicated
APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent * testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given. Canvassing in any form will disqualify.

* SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

A fully registered medical practitioner who is liable for National Service must obtain deferment of recruitment in writing from the Central Medical Recruitment Committee or (in Scotland) the Scottish Central Medical Recruitment Committee before accepting any civilian appointment. The provisionally registered position of provisionally registered medical practitioners with National Service has been made clear in a notice sent to them by the Ministry of Labour and National Service.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

(a) REGISTRAR: Posts obtained not less than two years after registration as a medical practitioner and held normally for two years: £850 per annum in the first year; £965 per annum in the second and any subsequent years.

(b) SENIOR REGISTRAR: Posts obtained normally not less than four years after registration as a medical practitioner and held normally for four years: £1,100 per annum in the first year; £1,200 per annum in the second year; £1,300 in the third year; £1,400 per annum in any subsequent years.

Other Grades Whole-Time

(i) Provisionally registered medical practitioners: £425 per annum for the first post held; £475 for the second and all subsequent posts held.

(ii) DOCTORS: Posts obtained not less than one year after registration as a medical practitioner and held normally for one year only: £725 per annum.

(iii) JUNIOR HOSPITAL MEDICAL OFFICER: Posts who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of their grade: £75 per annum for the first year after full registration as a medical practitioner by £50 to £1,075 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the duties proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

PRACTICES (Executive Councils)

For vacancies (except those in Scotland) apply on Form C.16A, or equivalent, to the Executive Council, Mark envelope * Vacancy.*

CLEVEDON, Somerset

Applications are invited for a vacancy (urban), due to resumption. List approximately 1,557. Residence and surgery available for purchase. Application, on Form C.16A, before November 9, to the Clerk, Somerset Executive Council, 11, Elmhyland Road, Weston-super-Mare, Somerset.

HOWOOD, Worcestershire

Applications are invited for succession to the practice of a deceased lady doctor. List approximately 880 patients, principally in the village of Howood. It is hoped that the successful applicant in the practice will reside within easy reach of Howood. Rent, £200 per annum. Accommodation used by the late doctor may be available, and, for a limited period, may be regarded as suitable. Applications should be made on a form to be obtained from the undersigned, with whom completed applications should be lodged not later than November 19, 1955. —A. R. Howie, Clerk to Renfrew County Executive Council, 44, Eccleston Street, Paisley.

WREXHAM

NATIONAL HEALTH SERVICE—DUNDEE EXECUTIVE COUNCIL

Applications are invited from registered medical practitioners desirous of succeeding the late or in the practice, becoming vacant on January 1, 1955, of a female doctor practicing in the city. The practice is held in very high esteem, and the Council understand that the house from which the practice is conducted would be available. Application to be made on a form which will be provided by the Clerk, Dundee Executive Council, 93, Commercial Street, Dundee, upon request. The completed application form, with copies of two recent testimonials, should reach the Council within fourteen days of the publication of this advertisement.
