Looking for New Healthcare Information Sources?

The Medical Device Register Library offers reference librarians a broad range of valuable healthcare information, targeted to persons seeking employment and information about the ever-expanding healthcare field. The directories are also valuable desk references for hospital purchasing agents, manufacturers, distributors of medical products, patent attorneys and engineers.

At the center of the product line is all inclusive two-volume Medical Device Register. The line also includes other data-filled information products grouped in the categories of devices, personnel, facilities and FDA-related information.

**MEDICAL DEVICE REGISTER®, DOMESTIC EDITION**

Published annually.

MDR is the most comprehensive and dependable guide to medical equipment and OEM companies. This unique resource lists over 80,000 medical products and nearly 11,000 suppliers in the U.S. Data includes: complete contact information, prices and product specifications, company size, ownership, key personnel and more. Fully cross-referenced for easy use. In addition to the 2-volume Domestic edition, a mid-year supplement provides an update of all new products and suppliers.

**MEDICAL DEVICE REGISTER®, INTERNATIONAL EDITION**

Published annually.

The MDR International is a directory of medical products, manufacturers, and distributors outside the U.S. Includes more than 20,000 product listings and nearly 7,000 suppliers in each of 67 foreign countries.

**DIRECTORY OF HOSPITAL PERSONNEL**

Published annually.

The Directory of Hospital Personnel is the only comprehensive source listing over 188,000 healthcare professionals in over 89 departments in 7,200 U.S. hospitals and infirmaries. Plus, full contact information and bed size are provided for every U.S. hospital. The hospitals are organized alphabetically by city within state and are indexed by hospital name and bed size. There is also an alphabetical personnel index to help locate specific individuals.

**INTRODUCING THE SURGEONS’ DESK REFERENCE™ FOR MINIMALLY INVASIVE SURGERY PRODUCTS**

The 1994 Surgeons’ Desk Reference™ For Minimally Invasive Surgery Products is a comprehensive hardcover resource. Dr. Eddie Joe Reddick and Dr. William Saye, of the Advanced Laparoscopy Training Center in Marietta, GA, have supplied a foreword focusing on the current and future impact of technological advances in laparoscopic surgery. In addition, they provide commentary throughout the Product Directory Section which highlights applications and benefits of various product technologies.

Over 3500 medical libraries have discovered a sure cure for an ailing catalog.

Automation fever. Hundreds of medical libraries suffer from it. And hundreds more have already found a fast, effective, and affordable treatment. They called in our top medical authorities. Since 1974, we've specialized in providing superior MARC-based products — from catalog cards and label sets to MARC Record Services via our Cataloging Input System/PROMAIL. We offer MeSH Authorities Processing using our own highly accurate database of authorities records from NLM. Both bibliographic and authorities information can readily be customized to work within any system. And if your current system is out of sorts, we can help you migrate to a healthier one. Because of our extensive experience, we also have quick turnaround time—sometimes as fast as 24 hours—and our costs are within most everyone's range. To find out how we can help your ailing catalog, please call.

We've been the perfect prescription for over 3500 libraries.

When Columbus went searching for knowledge, he did so without the benefit of modern equipment, an engine, or even an accurate map. Fortunately, today's discoverers in the medical community have Knowledge Finder® CD-ROM products from Aries Systems. Exploring medical literature is now fast, accurate (and even fun). End-users learn to search in minutes with our intuitive graphical interface, relevance ranking and powerful search engine. Choose natural language and/or traditional medical subject headings to access MEDLINE®, Health Planning and Administration and other specialty files. So do what Peggy Tahir, Manager of Libraries at California Pacific Medical Center, did. Install our network version, Knowledge Server®, on your IBM® PC (or compatible), Macintosh® or mixed network. Carry your clinicians and researchers to a new world—the vast world of medical literature.
Now you can have the best of both worlds. Literally.

With EBSCO you can work with our regional office in your area to ensure convenience, timeliness and efficiency in your day-to-day subscription transactions. And you can count on our other offices located near the places most journals are published to assist in obtaining full service for your subscriptions. In most cases, you may not even be aware that EBSCO staff from a remote location are working for you as well as your local office. Our 16 non-North American offices throughout the world can help serve your needs for non-domestic serials, no matter where they originate. Plus, by using one capable serials vendor for all your titles, you benefit through increased internal efficiency and more valuable serials management reports.
