Outstanding Product Award
Mecklermedia

ERL - the information professionals’ choice this year, and for years to come - offers:

**TRUE CLIENT/SERVER ARCHITECTURE**
ERL Technology maximizes network efficiency and ensures that users get optimal performance from the retrieval client of their choice.

**MULTIPLE PLATFORMS**
ERL Clients are available for Windows, Macintosh, DOS and UNIX platforms, so you can use the platform most consistent with your existing environment. ERL Server platforms include SCO-UNIX and Sun Solaris, with IBM AIX coming soon.

**EXPANDING OPTIONS**
Through our own development efforts, as well as industry collaborations, we continue to expand the number of client and server platforms available, offering even greater flexibility and choice.

**EASY INTERNET ACCESSIBILITY**
Now you can have Internet access to many databases on your choice of platform, with fully functional clients that provide the same search experience as their standalone counterparts - all for a fixed-fee subscription price.

**PROVEN NETWORK SOLUTION**
More than 85 major institutions and corporations worldwide have proven ERL to be an outstanding network solution. Now you can join them.

**ERL IS AVAILABLE TODAY!**
Call now for further details describing how you can benefit from ERL Technology, and to receive the new 1993 SilverPlatter Directory of products and services.

Contact us toll-free at 800-343-0064, or via the Internet at info@silverplatter.com.

**THE PDR FAMILY GUIDE TO NUTRITION AND HEALTH**

Authoritative Answers to Today’s Most Common Nutrition and Health Questions

FREE BONUS BOOK! Shrink-wrapped to each copy of the new PDR Family Guide to Nutrition and Health™ is a FREE pocket size (4” x 6”) Fat, Cholesterol and Calorie Counter.
Discover what your life science searchers are missing:

- meeting papers
- reviews
- patents
- books

Apply for a free trial of Biological Abstracts/RRM® on CD.

Help your researchers obtain references to information not covered by other biological and medical databases. Apply for a trial of Biological Abstracts/RRM (Reports, Reviews, Meetings) on CD and let your researchers evaluate how complete their search results will be with references to meeting papers, reviews, books, and U.S. patents.

Biological Abstracts/RRM on CD provides over 140,000 references to 2,000 meetings, symposia, and workshops annually, including:

- International Conference on AIDS
- Annual Meeting of the Society for Neuroscience
- Annual Meeting of the American Association for Cancer Research
- Meeting of the American Federation for Clinical Research

Researchers also can rely on Biological Abstracts/RRM on CD's references to review articles, books and book chapters, and U.S. patents.

Apply for a free trial today so your researchers can evaluate Biological Abstracts/RRM using their own areas of research. The trial program includes at least one quarter's worth of data, your choice of Ovid or SilverPlatter search software, quick reference card, database documentation, and complete support from the BIOSIS Help Desk.

NEW AND NOTEWORTHY IN '96!

Lippincott-Raven Publishers

With over 125 periodicals in medicine, nursing, allied health, and biomedical engineering, Lippincott-Raven is your primary source for contemporary, cutting-edge resources in these fields. We deliver the latest information in the formats that will serve you best. Here's a sample of journals and newsletters of special note to medical librarians...

Nursing Case Management: Managing the Process of Patient Care
Diane B. Williams, Editor
The new journal specifically designed for nurse case managers in hospitals and other healthcare delivery settings. Nursing Case Management provides practical, hands-on information for day-to-day management of patient care.
Vol. 1, 1996 / Bimonthly / ISSN 1084-3647

Home Healthcare Nurse
The official journal of the Home Healthcare Nurses Association, this indispensable periodical is now published monthly — providing even more practical, in-depth articles that will help all home healthcare nurses improve their practice and enhance their clients' lives.
Vol. 37, 1996. Monthly. ISSN 0084-741X

Computers in Nursing
Leslie H. Nicoll, Editor-in-Chief
Wherever the application of computer technology touches contemporary nursing practice, Computers in Nursing takes you there. With its new emphasis on user-friendly, practical coverage, a new format and design — all under the guidance of a new editor — the journal is now more than ever the singular resource that delivers real-life solutions to real-life problems.
Vol. 18, 1996. Bimonthly. ISSN 0736-8593

International Journal of Neuroradiology
Thomas P. Naidich and Anne G. Osborn, Editors-in-Chief
The new full-color forum for the latest state-of-the-art reviews and original research on important developments in neuroradiology from around the world.
Vol. 1, 1996 / Bimonthly / ISSN 1079-8110

For further information, call 1-800-777-2295 or FAX 1-301-824-7390

For a sample copy, write to The Marketing Department, Lippincott-Raven Publishers
227 East Washington Square, Philadelphia, Pennsylvania 19106-3780
Cardiovascular and Thoracic Anesthesia
Journal Club Journal

J. G. Reeves, Editor-in-Chief

The new journal that provides anesthesiologists, surgeons, and cardiologists with a time-saving, economical way to keep up with today's technical and clinical advances in cardiovascular and thoracic anesthesia.

Vol. 1, 1996 / Bimonthly / ISSN 1084-8528

The Journal of Women’s Imaging

Ellen B. Mendelson, Editor-in-Chief

The only journal in this new subspecialty that focuses exclusively on recognizing and diagnosing specific diseases and abnormalities affecting women, using a variety of imaging techniques.

Vol. 1, 1996 / Quarterly / ISSN 1084-824X

Journal of Bronchology

Dedicated to the Art and Science of Bronchoscopy and Related Diseases

Udaya B. S. Prakash, Editor-in-Chief

Exclusively devoted to bronchoscopy and closely related subjects, this timely journal provides essential information on all aspects of one of the most important diagnostic and therapeutic procedures in pulmonary medicine.

Vol. 3, 1996 / Quarterly / ISSN 1070-8030

Advances in Gastroenterology, Hepatology, & Clinical Nutrition

John P. Cello, Editor

Designed as a management resource for the busy clinician, this new journal is a multidisciplinary collection of the latest gastroenterology, hepatology, and clinical nutrition news. Major review articles synthesize major developments.

Vol. 1, 1996 / Bimonthly / ISSN 1085-6595
His world revolves around

unicorn

It is possible, right now, for you to provide your clients and patrons with the absolute finest in library services and support - worldwide. Our software is used around the world. It is an incredible capability that comes standard with SIRSI's most powerful Library automation system, Unicorn. Unicorns were created in 1982 by SIRSI. From that tradition, four decisions were made: sure that Unicorn users would always be able to perform skilled tasks, support Linux would be the operating platform, client/server would provide the infrastructure, Unicorn would be the perfect tool for networked systems, and digital libraries. These, and only these, are the reasons why Unicorn is today's continuously evolving technological breakthrough. SIRSI is the only vendor offering complete public and institutional software for Windows and Macintosh systems. SIRSI's award-winning WebCat is the first product to merge the web's efficiency with library cataloging and other Z39.50 databases to provide a standard world-wide library automation platform. While customers and other industry partners around the world have adopted SIRSI products, our outlook is clear. Tomorrow, there will be new breakthroughs, and Unicorn users will be there to capture them.

SIRSI

You need to reach the world. It needs to reach you.

Medical Libraries Need To Keep Current.

The Journal of Neurosurgery...

For over fifty years, recognized the world over for its authoritative clinical and research papers, case reports and cutting edge technical notes.

Neurosurgical Operative Atlas...

The best known and highest quality Atlas of surgical techniques in the specialty is a must for your neuroscience reference shelves.

These Can Help...

Special Topics Series...

This new series features comprehensive books on a variety of highly focused neurosurgical procedures and are getting rave reviews in medical journals.

Neurosurgical Topics Series...

These, the most authoritative, comprehensive and clinically relevant books in modern neurosurgery, are the cornerstone to your neuroscience catalog.

Yes! I want to review the FREE AANS Publications Catalog. I know that Libraries get 20% off list prices too!

CNS Magnetic Resonance Imaging in Infants and Children
Eric N. Faerber, Editor
This book is about magnetic resonance imaging (MRI) of the central nervous system (CNS) and orbits in infants and children. This book covers MRI of the brain, orbit and spine.
Clinics in Developmental Medicine 134
Distributed for Mac Keith Press
1-898-68301-8 Hardback $79.95

Disabled Children and Developing Countries
Pam Zinkin and Helen McConachie, Editors
Foreword by Alfred L. Scherzer, Cornell University Medical Center
This book provides a critical basis of knowledge from currently available models of therapy, treatment, education, and services for disabled children and their families.
Clinics in Developmental Medicine 136
Distributed for Mac Keith Press
1-898-68304-2 Hardback $59.95

Neonatal Behavioural Assessment Scale
Third Edition
T. Berry Brazelton and J. Kevin Nugent, Editors
With contributions by Constance Keefer, Dieter Wolke, Hanne Munck, Jean Gardner Cole, Donna Karl, Judy Beal, and Patricia Rissmiller
This is the most comprehensive examination of newborn behavior available and is used inter- nationally in both clinical and research settings. This manual provides background information on the Scale and presents information on training and a new chapter also provides guidelines for many other possible adaptations for use in clinical practice.
Clinics in Developmental Medicine 137
Distributed for Mac Keith Press
1996 159 pp.
1-898-68305-0 Hardback $29.95

Cambridge Medical Reviews: Haematological Oncology
Volume 4
James Armitage, Adrian Newland, Armand Keating and Alan Burnett, Editors
This series provides comprehensive and up-to-date reviews of current research and serves as a regular forum for the evaluation and dissemination of this new information from basic science to clinical applications.
Cambridge Medical Reviews: Haematological Oncology 4
0-521-46169-3 Hardback $100.00

The Cambridge Dictionary of Statistics in the Medical Sciences
B.S. Everitt
Providing over 2000 brief definitions of statistical terms found in medical and medical statistics literature, this dictionary will be an essential reference for workers in all branches of medicine, applied statistics and biostatistics. Use of mathematical formulas is minimal.
0-521-47382-9 Hardback $54.95
0-521-47928-2 Paperback $19.95

Gametes—The Spermatogonist
J.G. Grudzinskas and J. Yovich, Editors
Providing a wide-ranging analysis of the gametes and their reproductive role in humans, this text includes a detailed account of the spermatogonist.
Cambridge Reviews in Human Reproduction
0-521-47491-4 Hardback $110.00
0-521-47996-7 Paperback $39.95

Autoimmune Neurological Disease
Michael R. Pender and Pamela A. McCombe
This book provides a comprehensive, up-to-date and critical overview of the immunological aspects of autoimmune neurological disease.
Cambridge Reviews in Clinical Immunology
0-521-46113-8 Hardback $100.00

Immunological Aspects of the Vascular Endothelium
Caroline O.S. Savage and Jeremy D. Pearson, Editors
The importance of this book and, its main difference from others, is that it seeks to link basic scientific knowledge of the role of the endothelium in inflammation and immunity with what may happen in disease states.
Cambridge Reviews in Clinical Immunology
0-521-45249-X Hardback $89.95

Fetus and Neonate: Physiology and Clinical Applications
Volume 3: Growth
Mark A. Hanson, John A.D. Spencer and Charles H. Rodeck, Editors
This volume on the growth of the fetus and neonate is introduced with an overview of the physiology and endocrinology of normal growth, before looking in depth at the pathophysiology and clinical applications.
Fetus and Neonate: Physiology and Clinical Applications 3
0-521-45522-7 Hardback $120.00

Medical Books on the Cutting Edge

Human Variability and Plasticity
C.G.N. Mascie-Taylor, Barry Bogin, and G.A. Harrison, Editors
This book covers topics such as child growth, starvation, disease and the effects of migration, modernisation and other life style changes on human variability.
Cambridge Studies in Biological Anthropology 15
0-521-45399-2 Hardback $54.95

The Peroxisome
A Vital Organelle
Colin Masters and Denis Crane
Provides a basic introduction to the peroxi- some, followed by detailed and comprehensive discussion of its structure and function, and coverage of human peroxisomal diseases.
0-521-48212-7 Hardback $69.95

Emergency Mental Health Services in the Community
Michael Phelan, Geraldine Strathdee and Graham Thornicroft, Editors
Foreword by Alan Langlands
This book provides a comprehensive overview of current understanding about the provision of emergency mental health services in an era of community orientated care.
Studies in Social and Community Psychiatry
0-521-45251-1 Hardback $79.95

Schizotypal Personality
Adrian Raine, Todd Lenz and Sarnoff A. Mednick, Editors
Includes reviews of genetics, neurodevelopment, assessment, psychophysiology, neuropsychology and brain imaging while exploring the categorical and dimensional approaches to the understanding of schizotypal disorder.
0-521-45422-0 Hardback $89.95

Now in paperback...
Individual and Community Responses to Trauma and Disaster
The Structure of Human Chaos
Robert J. Ursano, Brian G. McCaughey and Carol S. Fullerton, Editors
"...well-written and informative...impressively wide-ranging. ..." — R.R. Cornelius, Choice
0-521-55643-0 Paperback $37.95

Cambridge University Press
40 West 20th Street, NY, NY 10011-4211. For further information, call Laraine Karl at 800.221-4512, ext. 340. Prices subject to change. Web site: http://www.cup.org
Nutrition, Lipids, Health, and Disease
A.S.H. Ong, E. Niki, and L. Packer, Editors

Nutrition, Lipids, Health, and Disease covers a topic of fundamental importance in basic biological research, as well as in biomedical, health and disease research. Lipids play a key role in all areas of cellular and organismal function, such as energy storage, structure, cell signaling, and oxidation–reduction reactions. The unique contributions of individual lipids and their distribution in food provide an ever-expanding field of research.

This volume arises from the workshop sponsored by UNESCO/Confederation of Scientific and Technological Associations in Malaysia (UNESCO/COSTAM) and the Society for Free Radical Research—Asia (SFRR—Asia) on this topic held September 1994 in Penang, Malaysia.

The main subjects of the workshop included lipid nutrition; lipid transfer mechanisms; antioxidants; regulation, signaling and gene expression; and degenerative, infectious, and chronic diseases. The intention was to strengthen the research base, since knowledge in this area has important implications and applications in biomedicine, public health, and biotechnology.

Nutrition, Lipids, Health, and Disease will be a unique and valuable resource for agriculturists, health professionals, basic scientists, and anyone working with natural products and lipid nutrition.

AOCS Member: $76.00

Brain Development:
Relationship to Dietary Lipid and Lipid Metabolism
J. Jumper and M.T. Clandinin

Development of the brain is an important consideration for students of nutrition, lipid scientists, and other health care professionals concerned with the growth of premature infants and for researchers involved in developing new infant formulas and infant foods. With an increase in the number of surviving premature infants and a growing interest in developing the “gold standard” for infant formulas, bringing together information regarding brain development and lipids may be beneficial and useful for many. The requirement and timely availability of the correct nutrients is critical because brain development is such a precise, complex, and one-time-only event. Limiting this book to only a concise discussion of lipids was not easy. It was accomplished by examining the different lipids and their roles in the brain, an organ highly concentrated in lipid. This book’s objective is to provide a focused overview (morphological, biochemical, and functional) of brain development and to exemplify the role of lipids in the important developmental events and the concepts that are potentially altered by physiological changes in brain lipid composition.

Your One-Stop Source for Full-Text Documents

Using our captive collection of over 3600 international journals, supplemented by access to strategically allied collections throughout the world, EMDOCS provides copies of articles in record time—even from difficult to locate sources.

**EMDOCS Provides**
- Full-text copies of articles referenced in:
  - EMBASE, The Excerpta Medica Database
  - MEDLINE
  - CABS (Current Awareness in Biological Sciences)
  - GEOBASE
  - Fluidex
  - World Textiles
  - Other biomedical, scientific, engineering and technical databases

**EMDOCS Means**
- Competitively Priced Document Fulfillment
- Tap Directly into the EMDOCS Journal Collection—Even for Difficult to Locate Articles
- Worry-Free Copyright Compliance
- Six Convenient Delivery Options Including Internet Fax Service
- Expert Handling of Every Aspect of Order Processing
- Advanced Technological Expertise
