MLA DocKits are collections of representative, unedited library documents from a variety of institutions that illustrate the range of approaches to health sciences library management topics. Expert compilers add introductory information and a brief analysis of the documents contained in the kit.

**NEWLY REVISED: DocKit #1: Position Descriptions in Health Sciences Libraries**
A position description should be updated regularly as an evolving agreement between employer and employee on the scope and expectations of a job. Find out firsthand how other academic, hospital, and special libraries have developed professional- and supervisory-level position descriptions. Compiled and revised by Carolyn G. Weaver. MLA, 1996. **Item #5345-00. $25.00/$31.00**

**DocKit #2: Evaluation Instruments for Health Sciences Libraries**
As cost constraints on the health care industry increase, medical libraries will continually need to justify their programs and their use of resources by providing important data. This DocKit contains more than 56 sample instruments (more than 300 pages) with practical ideas for conducting a formal evaluation. Compiled by Joanne G. Marshall, Ph.D. MLA, 1990. **Item #5350-00. $39.00/$45.00**

**DocKit #3: Collection Development Policies and Procedures in Health Sciences Libraries**
Use these sample documents to keep up with the information explosion by creating collection development policies and procedures or evaluating your library’s current policies. Thirty health sciences libraries, both academic and hospital, contributed the guidelines they currently use to shape their collections. Compiled by David H. Morse and Daniel T. Richards. MLA, 1992. **Item #5350-10. $29.00/$35.00**

**DocKit #4: Paraprofessional/Technical Position Descriptions in Health Sciences Libraries**
Define and standardize the rapidly expanding workforce of technicians and paraprofessionals in today’s health sciences libraries with these 130 descriptions of non-secretarial, non-MLS health sciences library position descriptions, classified by type of job and area of library service. Compiled by Van B. Afs and Virginia A. Lingle. MLA, 1992. **Item #5350-20. $38.00/$44.00**

**DocKit #5: Descriptive Floor Plans of Computer Centers in Libraries**
Creating a library microcomputer center involves many considerations, such as determining the physical arrangement and networking options. DocKit #5 includes surveys and floor plans to help you plan new computer center facilities or improve existing ones. Compiled by Robert J. Veenstra. MLA, 1995. **Item #5350-30. $22.00/$28.00**

**DocKit #6: Library Logos: Bookmarks, Guides, Business Cards, Mastheads and Letterheads**
DocKit #6 illustrates promotional logos from a variety of institutions and is designed to jump-start creativity and provide ideas for great promotional pieces and public relations tools. Compiled by Barbara Slater and Beverly Renford. MLA, 1995. **Item #5350-40. $19.00/$25.00**

**DocKit #7: World Wide Web and Other Internet Information Services in the Health Sciences: A Collection of Policy and Procedure Statements**
The documents collected for DocKit #7 address the administrative processes needed to develop and maintain Internet servers and World Wide Web sites efficiently. Examples of mission statements, resource allocations, and technical specifications are included. Compiled by Virginia A. Lingle and Eric P. Delozier. MLA, 1996. **Item #5350-50. $25.00/$31.00**

**DocKit #8: Electronic Searching of the Health Sciences Literature: Examples for End-User Searching**
This DocKit contains examples of proven search statements and strategies to illustrate a variety of concepts and principles. Compilers designed this kit to serve as a useful tool for bibliographic instruction librarians, and others involved in teaching database searching to end-users. Compiled by Stephanie Fulton and Barbara J. Henry. MLA, 1996. **Item #5350-60. $35.00/$41.00**
